-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

Applicant's election of Group II, claims 7-20 in the reply filed on October 12, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over DiCicca et al (US 4571342) in view of Schulman et al (US 4820538).

DiCicca et al disclose a flavoring composition with charred meaty notes prepared by subjecting a film of fat or oil to a temperature within the range of 150°C to 475°C in the presence of oxygen, followed by collecting the fat or oil (see entire document, especially the abstract). DiCicca et al also disclose the preheating of the oil (see Example 1).

The claims differ as to the use of a vacuum.

Schulman et al disclose a process of producing a charcoal broiled flavor by distributing a heated fat or oil as a thin film, which is exposed to a temperature of at least 600°F for a period of time less than 2 min. to exothermically heat the fat to at least 650°F and thereafter rapidly cooling the flavor product within a temperature range of

210°F to 230°F, wherein a vacuum is used to remove a portion of the vapor phase (see entire document, especially claim 1).

It would have been obvious to a person of ordinary skill at the time the invention was made to use the vacuum as taught by Schulman et al in that of DiCicca et al because the vacuum aids in the removal of vapors.

In the absence of a showing of criticality, the specific collection steps (i.e. perforated ball, turbulence) are seen to be no more than conventional and merely a matter of choice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached on 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
